

Service Parts – Component Recycling

Component recycling ensures that you get spare parts when you need them, and is an attractive alternative to new and expensive electronic spare parts.

You gain the benefits of:

- Immediate delivery from stock
- Plug and play repair of your fixture
- Compliance with genuine specifications
- Spare parts warranty applies

Included Component Recycling

Recycled components are inspected and refurbished at our manufacturing facility. All repairs are conducted in accordance with manufacturing procedures. The recycled boards are tested to meet the product specifications.

The refurbishment covers:

- Recycled boards updated to the latest standards
- The use of appropriate tools to avoid any damage to the circuit.

The defective components must be free of physical damage and be returned to Martin Professional.

Additional options with this Contract

- Return your boards for inspection of their condition
- Repair of your own returned components
