VC-Grid/Strip 25™ Mounting Frame

The VC-Grid/Strip 25 Mounting Frame facilitates fast and accurate installation of VC-Grids and VC-Strips. Horizontal and vertical offset between VC-Grids/Strips is maintained “automatically” by these frames, avoiding the need to spend time in measuring and aligning, and drastically reducing the amount of holes to be drilled. The VC-Grids/Strips are fixed to the mounting frame using the supplied screws.

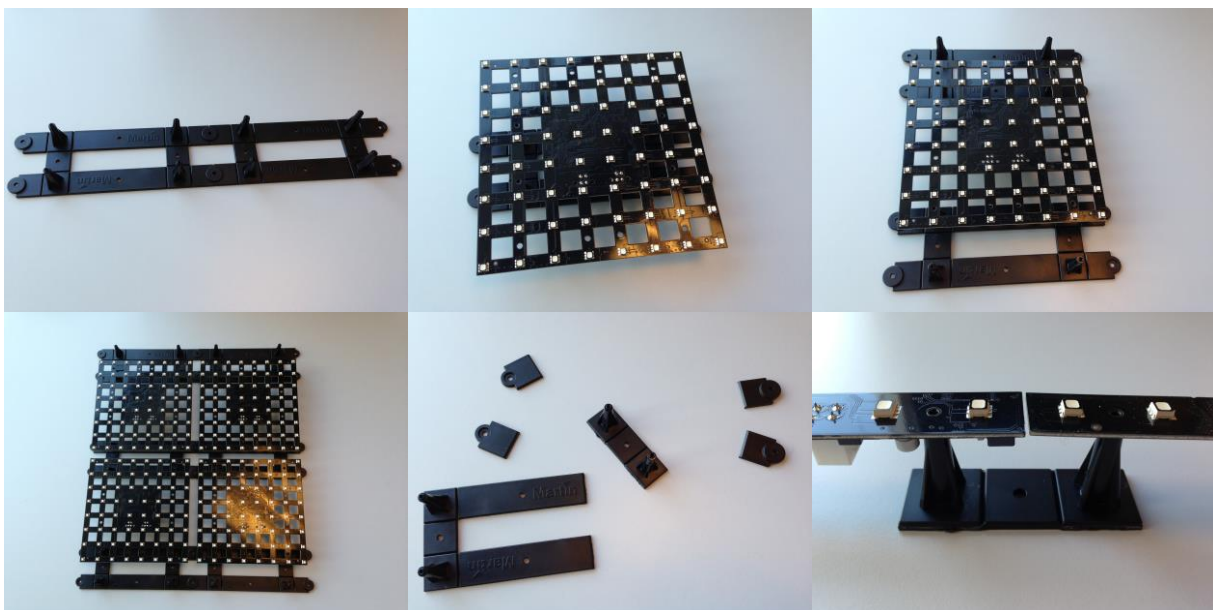

The Mounting Frame features several “break-lines” to customize it at the end of a line or in a corner. These also allow the Mounting Frame to be broken into 2 smaller VC-Strip Mounting Frames.

CONSTRUCTION Material: Injected plastic
Color: Matt black

WEIGHT 46 g
