## VC-Grid 15/30/60™ Mounting Frame

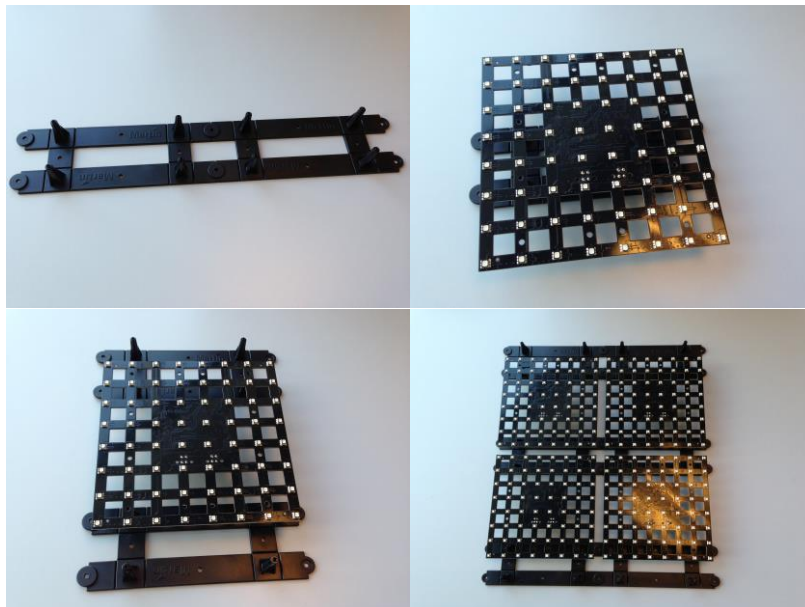

The VC-Grid 15/30/60 Mounting Frame facilitates fast and accurate installation of VC-Grids. Horizontal and vertical offset between VC-Grids is maintained “automatically” by these frames, avoiding the need to spend time in measuring and aligning, and drastically reducing the amount of holes to be drilled. The VC-Grids are fixed to the mounting frame using the supplied screws. The Mounting Frame features several “break-lines” to customize it at the end of a line or in a corner.

**CONSTRUCTION** Material: Injected plastic  
Color: Matt black

**WEIGHT** 46 g
